Design and Development of Dish Dazzle Restaurant Website Integrated with IBM Watson Assistant

Name:- Gitika

Project name:- Dish Dazzle Chatbot

Introduction

- AI-powered chatbot designed for Dish Dazzle Restaurant.
- Helps users explore menu, get recommendations, and interact online.
- Focus on text-based chatbot integration.

IBM Watson Assistant

- Cloud-based AI platform to build chatbots
- Provides text conversation capabilities
- Components: Intents, Entities, Dialogues, Web Chat
- Easy integration with static or dynamic websites

Technologies Used

- HTML: Builds the website structure.
- CSS: Styles pages and theme (Parrot Green).
- JavaScript: Adds interactivity & integrates chatbot.
- IBM Watson Assistant: Powers chatbot, handles intents, entities, dialogues.

What is an Intent?

- Represents user's goal or purpose
- Example:

1. User types "What should I eat?" → intent: #food_recommendation
2. User types "Show me desserts" → intent: #dessert_suggestion

What is an Entity?

- Extracts specific information from user input
- Example:

1.User says “I want Margherita pizza” → entity: Margherita Pizza

2. User says “I want a spicy paneer dish” → entity: Paneer Tikka

Dialogue/conversation flow

- Sequence of bot responses based on intents & entities

- Example 1: Opening Hours

  User asks: “What are your opening hours?”

  Bot checks intent: #opening_hours

  Bot replies: “We are open every day from 10 AM to 10 PM.”

- Example 2: Complaints / Issue

  User says: “I received the wrong order” / “Food quality was bad”

  Bot checks intent: #complaint

  Bot replies: “We are really sorry for the inconvenience. Please call us at 9817025950, our team will help you.”

Features of Dish Dazzle Chatbot

- Personalized Greeting – Friendly text greeting
- Smart Food Recommendations – Suggest popular dishes
- Text-Based Interaction – Users type questions or requests
- Web Chat Integration – Easily embedded on website
- Parrot Green Theme – Attractive and brand-consistent

Advantages

- Improves user engagement
- Saves restaurant staff time
- Enhances customer experience
- Easy integration into static website

Challenges and Solutions

- User input may vary → Solution: Proper intent & entity mapping
- Static website limitations → Solution: Future dynamic website for full features

Future Enhancements

- Add voice interaction (mic & TTS)
- Integrate with dynamic menu & order system
- Multi-lingual chatbot for wider audience
- Real-time order tracking and recommendations

Conclusion

- Dish Dazzle chatbot improves customer experience and engagement
- IBM Watson provides easy, professional chatbot tools
- Text-based version ready now; dynamic + voice features in future

- Any Questions?
